From de Gruyter : From Comic Strips to Graphic Novels (Narratologia) before purchasing it in order to gage whether or not it would be worth my time, and all praised From Comic Strips to Graphic Novels (Narratologia):

This essay collection examines the theory and history of graphic narrative - realized in various different formats, including comic strips, comic books, and graphic novels - as one of the most interesting and versatile forms of storytelling in contemporary media culture. The contributions assembled in this volume test the applicability of

narratological concepts to graphic narrative, examine aspects of graphic narrative beyond the 'single work,' consider the development of particular narrative strategies within individual genres, and trace the forms and functions of graphic narrative across cultures. Analyzing a wide range of texts, genres, and narrative strategies from both theoretical and historical perspectives, the international group of scholars gathered here offers state-of-the-art research on graphic narrative in the context of an increasingly postclassical and transmedial narratology.
