FOR THE SCHOLARLY ENTHUSIAST AS WELL AS THE CURIOUS PLANT AND FLOWER LOVERBy CustomerMuch time, hard work, and research went into the creation of this book. I know the author so know this.I have a copy acquired when it was first published. I wanted another copy as a gift for a friend who is a gardener and hortaculturist, and she is so appreciative. It is truly a book for a broad audience...from those who love and appreciate beauty and flower arranging , to those who are serious about botany and the life of pants and their care.Susanne Earls Carr2 of 2 people found the following review helpful. A great resourceBy Amy AndersonHighly recommended for readers who want not only to look at beautiful pictures, but want

a complete bibliography of plants including zone information and complimentary plantings. This book demonstrates that you can have beautiful cutting gardens that fit within a landscape rather than separate landscape beds and cutting beds.

Discusses planning a garden for cutting, annuals and perennials, borders, ornamental grasses, cut flowers indoors, dried flowers, and growing specific species

From Publishers Weekly Parke, a gardener in New York state who has written for Horticulture, the New York Times and elsewhere, sensibly combines information about planting and cultivation with advice about the practical art of flower arranging--all inside two covers. A typically lovely Stewart, Tabori Chang picture book, this one is laid out and illustrated so invitingly that it's all the hand can do to keep from plucking the delphiniums. But stay the hand--and keep reading. If you do, you will learn how grasses can serve in vases; how to harvest and dry flowers and foliage; and how to force blooming. Parke also includes chapters on bulbs and annuals, borders, and a compilation of plant "profiles" with reasonably detailed background information. Many gardeners will want to mull over this volume in the off-season. One reason: the photographs alone. Margonelli ( Invitation to the Garden ) has a special knack with flowers of purple and blue hues; his shots of shaded hydrangeas, campanula and violets are deep, sweet and still.
