**Malcolm Hillier : Garlands (Little Scented Library)** before purchasing it in order to gage whether or not it would be worth my time, and all praised Garlands (Little Scented Library):

This book provides practical instructions in the making of garlands with descriptive captions, artwork borders and full-colour photographs throughout. Part of "The Little Scented Library" series, the book gives the reader a host of traditional recipes and gift suggestions as well as imaginative new variations. There are original and pretty ideas for creating a fresh wedding garland, or a Christmas wreath of scented foliage. Scented endpapers are a fragrant reminder that outlives the special occasion. By the author of "Arranging Dried Flowers", "Flowers", "Container Gardening" and co-author of "The Complete Book of Dried Flowers".
