cdhenThe book was exactly what I expected. I was very satisfied and the children I did the project with were excited to try to make the gecko and most of them found the project easy to do.

This book will teach you step-by-step how to make "beadie babies" bead animals. 25+ easy to follow projects make it fun and easy. Color photos of each project will keep you on track! A great art motivator, making bead animals helps younger children develop counting, patterns and fine motor. Older kids just think its fun. This activity will keep your children entertained for hours.

From the AuthorThis book was inspired by the children of the Pacific Northwest. I feel privileged to be associated with such a wide-spreading phenomena. So many products, activities and styles are pushed at children. The success of bead animals has grown because it is an activity that they truly love to do and share with others. I have had many wonderful comments from parents regarding how focused there children were with the book. One parent said that here usually wild 8 year old son sat quietly for 4 hours working on projects from the book. I think each of us in our life wants to affect others in a positive way, no matter in what capacity. The response I have received from parents and their children has been wonderfully fulfilling.
