Another good book by WestermanBy ChristinaHad enjoyed Ms. Westerman's book on melt and pour soapmaking, so thought I'd try this candle book too. Good use of pictures to inspire you, but a couple of the "recipes" (ex. the rainbow candle) had somewhat confusing instructions. Not highly technical, though (I think it was just me and I just have to re-read it

again), and it's written in an encouraging style.

Candle gel is the hottest new product in candle crafting. This new product (95% mineral oil, 5% resin) is transparent, is extremely easy to clean up, and has a significantly longer burning time than traditional waxes. Author Kaila Westerman gives the basics of gel candle crafting in ten easy steps, then explores the endless possibilities for creating special effects with layers of color, swirls, bubbles, specialty molds, and embedments such as glass, botanicals, shells, stones, and pieces of solid paraffin candle wax. Readers can create candles that look like rainbows, aquariums, seascapes, playful sodas and other drinks, and more. Since gel candles cannot stand alone, each design is enhanced by wonderful whimsical, vintage, or even sophisticated containers.

Gel candles can look like a flaming Jell-O parfait or an aquarium or be a showcase for your favorite trinkets—these are among the 40 projects in *Gel Candles*. Donna M.
