**The PulledWax Company LLC, Steven B Brummett : Hand Pulled Wax: Luminary Projects for Experienced CandleMakers** before purchasing it in order to gage whether or not it would be worth my time, and all praised Hand Pulled Wax: Luminary Projects for Experienced CandleMakers:

This one of a kind book introduces you to the craft of making water candles by pulling wax underwater - which creates a phenomenon that has always fascinated candlemakers. The "Pulled Wax" technique is both fun to demonstrate and fascinating to watch. Step-by-Step projects will guide you through each stage of creating a water candle balanced to float or to be the perfect centerpiece candle. These projects are designed to provide the easy hands-on skills youll need to start pulling wax for fun, as gifts, or to expand existing candle product lines.

About the AuthorCandlemaker to Candlemaker: For over a decade I worked to develop the "Pulled Wax" technique of pulling hot wax underwater as I enjoyed both demonstrating at regional craft festivals and growing a wholesale market supplying candle shops in the Mountain tourist areas near my home. With the support of my wife I was eventually in a position to return to school, which led to a new career and two great children. Several decades later Im now returning to the craft of "Pulling Wax", with a focus on developing and teaching new techniques. This book contains many of my original notes, tips, and tricks of the trade, along with new techniques and discoveries that will help you start Pulling Wax.
