Wisdom from a Pro on Soap, Salves, and BalmsBy TruegritsThe author covers this subject well, giving reasons why you should handcraft salves and balms, providing some understanding of how the various ingredients work as well as process hints from his considerable experience and

proven sources for the ingredients. He provides a number of recipes and suggestions for how to vary them to customize them. This is a fluff-free book. It is quick to read, but it is intended to serve as a guide for actually making product. I enjoyed reading it and look forward to creating some salves myself. Don't ignore the wisdom in weighing vs. using volumetric measures. All chemical equations are mass-balance, not volumetric. We are so accustomed to volumetric measures in the kitchen, but even Alton Brown, the famous cooking guru of the cooking network, recommends weighing ingredients. Alan, thanks for a good guide. Don't understand the reviewer who said there were no recipes. Odd. Perhaps he confused your book for another.

By Onelovejoycreations Great read! I covered this front to back in 2 and a half hours and learned more than I could in all the research I've done in the last 3 weeks. I started making my own salves and balms after the kids had a bout with poison ivy and I know nature's poison ivy cure..but couldn't figure how to preserve it until some research. Now I am making healing salves and body butters of all kinds and this book added many ideas to my cabinet. I already sell them, but the info and links to wholesale and label/canning supplies is nice too. Good to have a few ratios and recipes to build on as well. Worth a read.

By KCI am brand new to creating my own natural product line. I have read a very many books so far and while some are good there are others that simply leave you scratching your head. This book was great. Informative, to the point and honest. I learned more here in the hour I spent with it than in 5 of the previous books I read. Thank you for sharing your knowledge:) God Bless:)

Handcrafting Artisan Salves Lip Balms From Your Kitchen "Imagine having a near magic formula that you could use to make your own beauty products for a fraction of the cost of the famous brand name ones..." Wouldn't you save a lot of money? Wouldn't that be fun? If you are tired of buying expensive beauty products without really knowing what you are getting, it may be time for a change. From the Author Making salves and lip balms and similar products is very easy. This book explains the basics of salve and balm making and then shows the reader how to progress to advanced salve making. Included in the book are several proven recipes for products of several completely different types. With the details you get in this book, the reader can make an endless variety of different products. You are in no way limited to just using these recipes. In fact, a main point of the book is to help you gain the freedom to make your own recipes. Why just copy what others have done? Have fun with your own creations. Experiment. Eliminate complicated, expensive skin care products from your life. Make your own.

About the Author The author is a professional crafter who writes about his projects. His soap and shampoo making experience includes producing and marketing over 35,000 bars of these, plus many gallons of liquid soaps. In addition to these products, his family has made and sold thousands of containers of salve and other personal care items. The author also tends cattle, goats and poultry on a tiny ranch in the rural South. His wife and four children work with him.
