By Janet Rochefort I have an extensive collection of quilt books and I was so excited when I got this one in the mail. I stopped what I was doing and sat down to "read" it. It has lots of great tips in it and the illustrations are remarkable. Edyta's step by step photo's will make it easy for both the new and old quilters. The wall hangings and table runners will be my first try and then onto the quilt. The color samples and her rule of five theory was great. I have seen her as an instructor and enjoyed her presentation, this book is just another great extension of her gift of quilting. I highly recommend it. 0 of 0 people found the following review helpful. Raw means raw By D. Griffin Will be making this. I wish it gave options to machine stitch edges but I will do that as total raw edge is not to my liking. 1 of 1 people found the following review helpful. Outstanding! By Sew-N-Sew Hop To It by Edyta Sitar is an amazing book. The

illustrations and pictures are impressive. The patterns of applique in this book are all illustrated to understand easier than most books of applique. The shipping was quick and was packaged very nicely. I have been very inspired to use the author's methods of teaching as they are very easy to understand and the results are always beautiful. The pricing was the best too. I was able to order several books to add to my collection of quilting books because of the savings I was able to receive through .com. I am very pleased with each transaction. Thank you to everyone who made this possible for me, from the author to the seller. I will definitely use .com to search for other books I am looking for in the future.Sew-N-Sew
