5 of 5 people found the following review helpful. Outstanding!By DDIPTThis book is outstanding in every way! The models are literally awesome, the photography is of excellent quality, the text is clear, and the book is very well made. This book exceeded my expectations. It contains photographic and textual descriptions of over 70 unique models, in 10 categories, by 36 builders, made with Lego parts, most consisting of thousands of individual pieces. Categories consist of the following:AgriculturalAircraftAutomotiveConstruction EquipmentMiscellaneousMotorcyclesSupercarsTracked VehiclesTrucksWatercraftFor many models, the diagrams of the internal drive mechanisms are also provided. The text for each model is generally divided into three sections: "About the Model," "Challenges," and "The Original (i.e. the life-size device)." Many of the interesting features are annotated in the photographs. The Credits section lists the builder and web address of each model, most of which

include instructions and videos. Many thanks to Pawel Kmiec and Eric Albrecht for producing this book. 0 of 0 people found the following review helpful.
