Each chapter starts with a brief bullet list of "what you will learn". The author goes far beyond the typical basic materials list with tying instructions. User questions are anticipated prior to the starting of each fly with clear explanations given to as to the how and why of certain procedures. For example "Why Apply the dubbing with the thread advanced a few turns ahead of the starting point", "What's the proper length of a wrapped hackle", "Why leave a tiny bit of bare quill exposed at the hackle tie-in point".Step by step instructions are clearly written with several close up color photos of each step. Most photos have yellow arrows that highlight key/important

points the student should pay particular attention to. Included are chapters on "Fly Tying Tips", "Hackle Selection", "Spinning Deere Hair" and instructions and for tying several fly popular flies. This book should advance one's fly tying knowledge by several years in a very brief period of time. 0 of 0 people found the following review helpful. Lots of good pointers. Dick Talleur has done an outstanding job of showing us some of his little known tricks. He is probably the best overall tyer I know. I have taken lessons from Veverka, Talleur, and Shewey. Dick is the best 'teacher' of them all. Kudos on another fabulous tying book. Definitely a "Must have". joel stansbury

From Booklist For those who don't know it, tying flies is not only a practical hobby for the avid fisherman but also an art form--to say nothing of the emotionally soothing properties of spending time practicing it. Well-tied flies are a thing of beauty to behold. Talleur, a veteran writer on the subject, invites newbies and experienced tiers alike to benefit from his up-to-date information and thinking. His latest guide stems from the availability of newer materials and new graphics technology (the latter making the illustrations clearer in detail), as well as some new designs he recently came up with. He begins with 13 basic fly-tying tips, and then each subsequent chapter covers a different project, each of these chapters beginning with a list of what tasks, techniques, or strategies will be learned in that chapter's pages.
