W.K.V. Gale : Ironworking (Shire Library) before purchasing it in order to gage whether or not it would be worth my time, and all praised Ironworking (Shire Library):

Iron has been used for about 4000 years; it was essential to the industrial revolution and is still the principal metal of commerce. This book describes how iron and steel have been made from earliest times to the 20th century.

About the AuthorThe late W K V Gale came from a family long engaged in the making of iron and steel and spent all

his working life within the industry. He was a technical adviser on iron and steel history to the Ironbridge Gorge Museum, the Black Country Museum and the Department of the Environment.
