His wife was also an artist who worked in theatre w/ musician Benjamin Britten 0 of 0 people found the following review helpful. Excellent gathering of Piper's stained glass By Derrick F. Donovan The author places John Piper and his work into the historical continuum of stained glass so that we appreciate the great contribution he has made in design, creative advance and the fearless use of modern materials. She does not assume technical knowledge on the reader's part and so gives clear descriptions of processes and materials. The net outcome of the book is to give Piper the recognition he deserves not only as a stained-glass artist but also as one of the leading - if comparatively under-rated - English artists of the 20th century. The book is profusely illustrated in colour the only let-down being the quality of some of the photographs, too many are either not sharp or over-exposed. Thus a rating of 7.

Written in collaboration with his widow, this is the first book to explore and reproduce the magnificent stained glass of this renowned 20th century artist. The internationally renowned artist John Piper (1903-1992) was arguably the greatest 20th century designer in stained glass and this is the first book to explore and reproduce this magnificent work. It establishes Piper's standing as a hugely influential artist beyond the medium of paint. Over 100 examples of

Piper's stained glass from around the world are reproduced, allowing the reader to appreciate for the first time the range of the work and providing an illustrated historical catalog. Also reproduced are many original sketches and plans as well as photographs of the artist at work.
