**From Corning Museum of Glass : Journal of Glass Studies 1996 (Vol 38.)** before purchasing it in order to gage whether or not it would be worth my time, and all praised Journal of Glass Studies 1996 (Vol 38.):

The Journal of Glass Studies presents original research on topics related to the history of glass from its beginnings to the mid-20th century, a selection of recent important acquisitions made by public and private collectors, and a list of articles and books on glass added to the collection of the Museum's Rakow Research Library during the year. This volume is devoted to a study of the life of Franz Gondelach, a German and one of the most brilliant engravers of the 18th century. The piece, in 16 chapters, was written by Franz Adrian Dreier, a distinguished scholar of European glass. Also included in this volume is a list, with pictures, of recent important acquisitions.
