Jack Streat : LEGO Heavy Weapons before purchasing it in order to gauge whether or not it would be worth my time, and all praised LEGO Heavy Weapons:

3 of 3 people found the following review helpful. would be easy to put together By Ed Every detailed book, would be easy to put together. But seems will be a pain to get the specific pieces to make them. 0 of 0 people found the following review helpful. Awesome! By Customer Awesome! 0 of 0 people found the following review helpful. Book is Excellent, Legos are Hard to Get By Amy I bought this book as a gift for my husband and he loved it. He and all of his guy friends think it is the greatest thing ever. The only problem is that he hasn't actually been able to use it yet since it is prohibitively expensive to try and track down all of the specialty Lego pieces you need (the book does offer some suggestions).

From LEGO guns mastermind and 18-year-old YouTube sensation Jack Streat comes LEGO Heavy Weapons, a collection of complete building instructions for four truly impressive, 1:1-scale replicas of the world's most iconic

firearms. LEGO Heavy Weapons will show you how to build brick-based models of: A massive Desert Eagle handgun, with working blowback action The compact but deadly AKS-74U assault rifle with folding stock A bolt-action Lee Enfield rifle (a.k.a. Jungle Carbine) A pump action SPAS combat shotgun Each set of instructions includes a complete parts listing, so you can find (or special order) any hard-to-find bricks. The book's illustrated, step-by-step building instructions will be clear to anyone who's ever played with LEGO bricks, and the biggest models will challenge and delight even the most serious builders.

.com Desert Eagle Say hello to the Desert Eagle possibly the meanest of all handguns and definitely one of the biggest. With Mark VII and XIX models available in .50 Action Express, it's also one of the most powerful production handguns to date. The sheer power, size, and weight of this beast have made it the director's pick in many an action movie, even though it has some inherent drawbacks when compared to a smaller, lighter weapon with a larger magazine capacity. That said, there's no way any other pistol comes close on a scale of sheer awesomeness. The Desert Eagle is a gas-operated, semiautomatic pistol. Gas operation (where the expanding gasses from the fired round push a piston, which operates the action to chamber a new round) for a pistol is unusual, as normally a pistol's action is cycled simply by recoil. The gun can be chambered for a variety of rounds, including the previously mentioned .50 Action Express and the .44 Magnum. It feeds from a detachable box magazine, which holds nine, eight, or seven rounds (single stack), depending on the caliber being used. About the Author Since posting his first LEGO gun online at age 13, Jack Streat has played an influential role in the LEGO weapons builder community. In his spare time he modifies guitars in a never-ending quest to make them as loud as possible. Streat wrote this, his first book, when he was 18 years old.
