Think Outside the Box: Some fun IdeasBy JMB369I bought this book because I am an avid scrap book person, and writing the stories is as important to me as showcasing the photos. Sometimes I cannot find the die cut or sticker letters I want. This book reminded me that I used to do calligraphy, and I am also a doodler. So I can make my own! One of the most useful features of the book is a page describing different kinds of pens and pen tips, and the special effects each one can create. I also enjoyed the variety of border patterns and "doodles", and these are scattered throughout the book. The alphabets themselves were somewhat disappointing, and are the reason I gave the book 4 stars instead of 5. They are just a little too whimsical, and I felt as if I have created

similar letters on my own. All in all, this is a good little book. It was on sale when I bought it, and it was definitely worth that price. Full price? I'm not sure! 8 of 8 people found the following review helpful. Glad I found this! By B. Monteith This book has many fun ideas and designs for making letters and borders. I use these ideas to teach elementary children fun art projects and to use them in art journaling. 0 of 0 people found the following review helpful. Lettering books By Customer I like the easy starting book for kids. Finding time to practice is hard right now, but I can use all books as defense. Want to at least use on envelopes of greeting cards, maybe just the first initial.
