R. J. Harvey : Locomotives in Detail 1: Bulleid 4-6-2 - Merchant Navy Class before purchasing it in order to gauge whether or not it would be worth my time, and all praised Locomotives in Detail 1: Bulleid 4-6-2 - Merchant Navy Class:

The first in an important new series looking in depth at different locomotive types and designs. The Southern Railway Merchant Navy class is the subject and includes, for the first time, comprehensive drawings in 4mm scale for each of the three series as well as the rebuilt locomotives, together with the main external alterations applied throughout their lives. The text, supported by many detailed photographs, takes a fresh look at the development history of the class and explains the main changes, including livery details. With fold out drawings, this is a valuable reference source for

modellers as well as historians and all steam locomotive enthusiasts.
