**Ann Kay : Make Your Own Jewellery Using Metal, Wire, Paper Clay** before purchasing it in order to gage whether or not it would be worth my time, and all praised Make Your Own Jewellery Using Metal, Wire, Paper Clay:

8 of 8 people found the following review helpful. Good and not so good....By R. EberhardWorking and teaching in Mixed Media, I purchase books that look like they will assist and appeal to my students. On the surface and definitely the front cover! this looked like a good fit. However, the projects in my opinion on the front cover were the best. There are some lovely enamelling projects, not to hard for beginners-intermediate. These are definitely more geared to the traditional jewellery maker.The book for me then spiralled downwards.Projects that would suit school kids, or first time crafters is the best way I can describe them. Paper rolled around a straw for Paper jewelry - done to death (see the Art of Paper Jewelry for real creativity ). Polymer projects that whilst photographed well left little to the imagination -

again, done a zillion times over in any polymer book. This book is best for total beginners in the entry to the craft area, teachers working with children etc. Had I been able to look through this book before purchasing, I doubt I would have got it.

40 step-by-step projects for creating up-to-the-minute rings, brooches, earrings, bangles, necklaces, brooches, hair accessories and trinket boxes.

About the Author Ann Kay, the editor of this book, is an experienced crafts consultant, editor and writer who has compiled many books on a wide range of subjects. For this book she has selected a range of projects contributed by a team of leading craftspeople and jewellers.
